

We can not recieve cell phone calls in our area. As a nurse practioner covering call for the hospital, it is esssential I be able to recieve and make calls to the hospital and nursing home. I am on call 50% of my life - and as it stands now, I can not be reached by phone if I want to go on a walk, work in the garden, run to the store, go to my kids ball games, etc. etc while on call. Please address this issue!!
